

DR. BABASAHEB AMBEDKAR TECHNOLOGICAL UNIVERSITY, LONERE**Regular End Semester Examination – Summer 2023****Course: B. Tech.****Branch : Electrical Engg****Semester :VIII****Subject Code & Name: The joy of computing Python****Max Marks: 60****Date:****Duration: 3 Hr.****Instructions to the Students:**

1. All the questions are compulsory.
2. The level of question/expected answer as per OBE or the Course Outcome (CO) on which the question is based is mentioned in () in front of the question.
3. Use of non-programmable scientific calculators is allowed.
4. Assume suitable data wherever necessary and mention it clearly.

		(Level/CO)	Marks
Q. 1	Solve Any Two of the following.		
A)	Take two integers as an input and display the difference of second number from first number.		6
B)	You given a number as the an input. You have to display all the numbers from 0 till x.		6
C)	List the rules to declare a variable in Python.		6
Q.2	Solve Any Two of the following.		6
A)	Mention the advantages of continue statement. Write a program to compute only even numbers sum within the given natural number using continue statement.		6
B)	You are given a list L. Print the list of first 3 smallest elements in ascending order and last 2 greatest elements in descending order of the list L respectively.(We will take care of the input)		6
C)	Describe python language support for Arithmetic operators. Write a python programs to calculate students result based on 2 exam. 1 sport event and 3 activities conducted in a college with weightage of activity =20% and sports = 20% for 50 marks.		6
Q. 3	Solve Any One of the following.		
A)	Write a python program to find the best of two average marks out of three test's marks accepted from the user.		6
B)	Explain while and for loop, write a program to compute only even numbers sum within the given natural number using continue statement.		6
C)	Write a Python Program to check whether a number is prime or not using while loop and print appropriate message.		6

Q.4 Solve Any Two of the following.

- | | | |
|----|--|---|
| A) | Summarize various operators, built in functions and standard library modules that deals with Python's numeric types. | 6 |
| B) | Define tuple. Explain DSU pattern. Write pythonic code to demonstrate types by sorting a list of words from longest to shortest using loops. | 6 |
| C) | Write the python code to display the last six characters of the string "make hay while the sun shines to the console" | 6 |

Q. 5 Solve Any One of the following.

- | | | |
|----|--|---|
| A) | Implement a Python program using Lists to store the average of N integers accepted the user. | 6 |
| B) | How tuples are created in Python? Explain different ways of accessing and creating them | 6 |
| C) | Explain values and items method used in dictionary with example. | 6 |

*** End ***

The grid and the borders of the table will be hidden before final printing.
