

- Q. 2. Attempt the following (12)
- Explain accuracy, precision, resolution and linearity of measuring instruments.
 - Explain the thermocouple method of measuring True RMS Value.
- Q. 3. Attempt the following (12)
- What is standard? What are different types of standards?
 - With block diagrams, explain how digital frequency meter can be used to measure time interval and frequency ratio.
- Q. 4. Attempt the following (12)
- Explain vertical amplifier, delay line and time base generator used in oscilloscope. <https://www.batuonline.com>
 - With the help of a block diagram explain the working of a dual trace oscilloscope.
- Q. 5. Attempt the following (12)
- Explain functional block diagram of frequency selective wave analyzer.
 - Draw and explain block diagram of FFT analyzer.
- Q. 6. Attempt the following (12)
- Write a note on signal separation device used in network analyzer.
 - Explain the most commonly used receiver techniques in network analyzer.
- Q. 7. Attempt the following (12)
- Explain typical automatic test system with necessary block diagram.
 - Explain the testing of audio amplifier using block diagram.
